Quick-Change Partyist

by Ucaoimhu

Oh, no! In shifting so quickly from Mystery Hunt mode to party mode, a transition represented by a sequence of five items you can find in the completed grid, I have overlooked the three intermediate items; that is, for each of those three items, I have put six Down answers into the grid without that item. (All Acrosses, on the other hand, work normally.) For each Down clue, note the position of its corresponding item in the sequence, and take the letter at the same position in the clue; if you read these letters item by item, in clue order for each item, you will get an appropriate message.
