

The University of Chicago Young Scholars Program For Mathematically Talented Youth

Summer 2011: July 5 – 29, 2011
9th and 10th Grade Component

The Young Scholars Program for mathematically talented students who have just completed grades 8 and 9 will take place at the University of Chicago from July 5th to July 29th, 2011. This is a continuation of the program which began in the summer of 1988. **The program is free to all students;** funds for YSP are provided by the Materials Research Science and Engineering Center at the University of Chicago, the National Science Foundation, the Office of Academic Enhancement of the Chicago Public Schools, the Educational Advancement Foundation, and the Mathematics Department of the University of Chicago.

The program for ninth and tenth graders will consist of two courses. The main course will deal with topics in advanced geometry. This course will be taught by Dr. Paul J. Sally, Jr., Professor of Mathematics. **Because of the subject matter being covered this summer, students applying for the 9th-10th grade component must have completed a course in geometry to qualify for the program.** The second course in the program will be a course in applied math.

The aim of the program is to strengthen the participants' mathematical powers through a deep experience in mathematical thought and effort. Our intention is to broaden and enrich the students' understanding of mathematics rather than to accelerate them through the standard high school curriculum.

The first day of the program will be Tuesday, July 5th, 2011. **Students must be able to attend all four weeks of the program.**

The program will take place Monday through Friday from 9:30AM to 2:30PM (except on Fridays when the program will end at 12:00 noon). Mornings will be spent in lectures led by Dr. Sally. Students will be given an hour break during the day for lunch. Lunch will be provided on campus for all participants. Each day, the students will be divided into small groups, with each group conducted by a seminar leader who will discuss homework problems and the ideas underlying the day's lectures.

We will be unable to provide assistance with housing or transportation. Space in the program is extremely limited. Because of the highly competitive nature of the program, if you are offered admission into the program and accept, you must attend all meetings for the four weeks of the program. If there is any reason for a possible absence, we must be informed of such anticipated absences with the acceptance of admission. Students who accept admission and do not attend every session will not be considered for future programs.

FOR MORE INFORMATION AND APPLICATION FORMS, WRITE OR CALL:

Young Scholars Program e-mail: ysp@math.uchicago.edu
Young Scholars Program phone number: (773) 702-7389

A handwritten signature in black ink that reads "Paul J. Sally, Jr." with a stylized flourish at the end.

Professor Paul J. Sally, Jr.
Director of Summer Programs

**Summer 2011: July 5 - 29, 2011
9th and 10th Grade Component**

Application Form: (Please PRINT or TYPE)

Name _____ Male _____ Female _____ Birth Date ____/____/____
(Last, First Middle) (MM/DD/YY)

Permanent Address: _____

City: _____ State: _____ ZIP: _____

Telephone (_____) _____ Grade completed by June 2011: _____

Name of Parent(s) or Guardian: _____

Name of Math Teacher: _____

Current Mathematics Course: _____

School's Name: _____

School's Address: _____

Teacher Recommendation: Please have your mathematics teacher send us a letter of recommendation on the attached form. (*Either have your teacher seal the letter in an envelope and give it back to you or provide your teacher with a stamped envelope so that he/she can mail it to us directly.*)

Short Essay: On a separate sheet of paper write us a short essay about your interest in mathematics. You should include the following: how mathematics fits into your overall interests; any special mathematics projects you may have undertaken; any mathematical question or problem you find particularly interesting or challenging; what your plans and ambitions are, and what part mathematics has in them. *Returning participants should include in their essay a description of what they enjoyed most about YSP.*

Check List for Applicants:

- _____ Completed and *signed* application form
- _____ Teacher recommendation
- _____ Short essay
- _____ School transcript *required* (for students who have completed 9th grade)

Send this completed and signed form, along with the accompanying materials, to:

Young Scholars Program
Department of Mathematics, University of Chicago
5734 South University Avenue
Chicago, IL 60637

Applications must be received by **May 16**. Late applications may not be considered. Successful applicants will be notified by mail in early June. We will not notify applicants as to their admission status over the phone. **Applications without an essay or teacher recommendations will NOT be processed.**

I understand that if admission into the program is offered and accept, the student must attend all meetings for the four weeks of the program. Students who fail to attend all meetings will not be considered for admissions to future programs.
