Office Hours: Monday 2.15-3.30 pm, Wednesday 2.15-3.30 pm, and by appointment

Text: Introduction to Analysis, William R. Wade, third edition

General Policy: There will be two in-class hour tests and a final exam. Homework will usually be assigned in one class period and due one week later. You should feel free to work on the homework together, but you should write up your solutions independently. Here is how I will weight these items:

Hour tests: 40

Final exam: 40

Homework: 20

Important dates:

Hour test 1: Wednesday, April 30 (week 5)

Hour test 2: Wednesday, May 28 (week 9)

Final exam: Friday, June 13, 10:30-12:30 am

It is the policy of the Department of Mathematics that the following rules apply to final exams in all undergraduate mathematics courses:

- The final exam must occur at the time and the place designed on the College Final Exam Schedule. In particular, no final examinations may be given during the tenth week of quarter, except in the case of graduating seniors
- Any student who wishes to depart from the scheduled final exam time for the course must receive permission from Paul Sally (office is Ry 350, phone is 2-7388, e-mail is sally@math.uchicago.edu). Instructors are not permitted to excuse students from the scheduled time of the final exam except in the cases of an Incomplete

Miscellaneous items of interest:

Incompletes are rarely given, and only for cases of extreme personal tragedy. I will almost never give a make-up exam
