

The Old One-Two

by Ucaoimhu

This evening's event, perhaps the last in a series, brings to mind two one-word terms; to get from Term 1 to Term 2, you can apply the following two phonetic transformations:

(1) One word (Word 1) appears phonetically in Term 1, and must be changed to a different word (Word 2). Five Down answers, read phonetically in clue order, give a definition of Word 1; the corresponding (completely different) grid entries, read phonetically left to right, give a definition of Word 2.

(2) One phoneme (Phoneme 1) appears more than once in Term 1, and must be changed to another phoneme (Phoneme 2) each time it appears. Five Down answers contain Phoneme 2; the corresponding grid entries have Phoneme 1 in its place.

The remaining Down clues each contain an extra letter, which must be removed before solving; these letters, in clue order, nonphonetically describe another apropos aspect of this series, not hitherto mentioned in this puzzle.

ACROSS (all of which work normally)

1. Chip perhaps left for an Italian hot spot (4)
4. Not clerical or revolutionary or kingly (5)
9. Movie Soderbergh filmed near Rhode Island is a Michelle Pfeiffer flick (5)
