German Food by Ucaoimhu

Some squares will contain one of two bigrams:

(1) If the first bigram is in the nth square of an Across entry, take the nth letter of its clue. In clue order, these letters will describe each such square; prepending one word gives you food.

(2) If the second bigram is in the nth-to-last square of an Across entry, take the nth-to-last letter of its clue. In clue order, these letters will describe the bigram in German; if read differently, they constitute one word.

(To tell you which bigram is which, they often appear in a row or column in (1), (2) order, but what they spell out that way is nonsense.)

Finally, if a Down entry has either the first bigram in its nth square or the second in its nth-to-last square (or both), circle both the nth and nth-to-last letters of its clue. The circled letters will give a message relevant to the two words.

ACROSS

1. As rot decayed a book of a certain size
6. A place where you’ll find party-goers to embarrass
10. 40% could list one Toyota line
11. Automobile part that protects police officer possessing skill (2 wds.)
