

# Pacific Northwest

as told to Ucaomihu

In the peaceful Shire, in the northwest of Middle Earth, 26 clues are able to remain uninvolved in any gimmickry. Alas, things are different for you (and 26 other clues), young hobbit. Eight grid entries will mark the path of your journey (past the entity in the shaded rows). The first entry will be altered by receiving an item; it will then cross another entry, altering it the same way, and so on, until at last you reach an entry the item belongs in, *without* alteration. (One altered entry is NI2.)

This item is also so corruptive that eight other clues, each for an entry crossing one of the “path” entries, show their former selves only in the definition part; the entry for each instead matches the cryptic part, which yields a very different answer.

For each “path” entry and “corrupted” entry, find the position in each where they cross, and circle the letters in *both* those positions in *both* clues. In path order, the circled letters in the “path” clues will give one place where the item might safely go, but those in the “corrupted” clues will give a better place. To correctly solve ten more clues, you must take a single letter from each of five of them, and move it across to one of the other five; these five letters, north to south, will say how you might reach the second location.

“Wait! There are six more Across clues!” you cry. Yes, and each of these has an extra word you must remove before solving. But don’t worry about those words until you finish solving this puzzle, and read the rotated square in the corner.)

## ACROSS

2. 300-page text from the Cold War (*abbr.*)
6. One’s whips employed by heartless editor more than once!
12. Goad in Egypt or points west, making a loud noise
13. Aurally evaluate singer Bonnie

46. Protector of workers in turboshaft (*abbr.*)
47. Large lion’s tail obstructs M2
49. Having many ales after ditching with archaeologist from *Raiders of the Lost Ark*

## DON’T READ UNTIL DONE:

Change one letter in each of six (not necessarily consecutive) Down words so they are defined (in order) by the extra words. Then put your means of transportation in the first shaded column, then do some joinery, to get an image that will lead you to a document findable in this hotel. With the document oriented properly, put its leftmost word (rotated like this) on top of its rightmost word (read cryptically) to see what fantasy ruler reigns supreme.
