

Fearful Symmetry

by Ucaoimhu

This crossword tournament, and when it occurs, are causing unease to some. In this puzzle, half of the clues have an incorrect letter, which must be corrected before solving; read all the incorrect letters, then all the corrected letters (both in clue order) to see a question about this unease. Also, for each such clue, if the *n*th word contains the incorrect letter, shade the *n*th square of the answer, and also the square symmetrically opposite it by the usual crossword symmetry; the shaded areas (taking sound into account for the top and bottom ones, and shapes into account for the others) will give the answer to that question.
