

# Multiples of Pie

by Ucaoimhu

Combine all the ingredients in 13 Across to get something that will tell you where to find one ingredient for a pie (when read properly), and what quantity of that ingredient is used. Another ingredient from the same source can be found in the grid, but not quite in its prescribed quantity; if you triangulate to determine the logical place to look for the missing amount *outside* the grid, you will find a third ingredient there instead (whose quantity is specified less precisely).

## ACROSS

1. Costello had sounded blue
4. 12.5% of builders don't have ebony
8. Old sergeant, perhaps the one ruling Mongo, is heading straight at you
11. In favor of hiding alien's stench
